

# 2016 DECK OFFERING

## A BREAKTHROUGH TECHNOLOGY

Alloy Armour Technology™, developed by our advanced polymer chemists, is a proprietary alloy blend that provides improved performance characteristics, such as outstanding weathering protection, UV protection, resistance to scratching and the ability to hold color over time. Rigorously tested, Alloy Armour Technology™ allows

us to confidently provide an industry-best 30-Year fade and stain warranty. Alloy Armour Technology™ is the next generation of cap stock material formulations for AZEK decking and represents our continued focus on R&D and commitment to pioneering breakthroughs in material science.

## DO NOT MIX

You CANNOT mix next-generation (2016 and later) *New Kona*®, *New Acacia*®, and *New Morado*® with those existing colors from 2015 and previous years. The new material science that is used in the capping material is truly next-generation, so improved long-term performance will become apparent over time.

## CLASS "A" FLAME SPREAD

Independent testing has resulted in a Class "A" Flame Spread Index for AZEK Vintage Collection®. The rating is based on results (under controlled conditions) per ASTM E84, which is recognized by the International Building Code (IBC) as a standard method for testing flame spread.

DECK PRODUCTS	Square Shouldered Lengths			Grooved Lengths			Fascia 1/2" x 11 3/4"
All Deck Boards 1" x 5 1/2"	12'	16'	20'	12'	16'	20'	12'
